# Urgent Care Assessment

Harbourview Demonstration Urgent Care

**Patient: Jordan Test | Fully fictional identity**

**Date of service: 2024-02-14**

Record type: Urgent care | Prepared by: Attending clinician

## REASON FOR CONTACT

Low-back soreness and neck stiffness following a recent motor vehicle collision.

## OBSERVATIONS / FINDINGS

Walking independently. Paraspinal tenderness with guarded lumbar motion; no documented new bladder or bowel symptoms.

## ASSESSMENT / INTERPRETATION

Acute mechanical low-back and cervical strain symptoms; further observation advised.

## PLAN / NEXT STEP

Discussed gradual activity, symptom diary, and reassessment if symptoms worsen.

Fabricated names, facilities, symptoms and events for testing only.
Not clinical advice, evidence, a claim record or a real medical chart.
