Neurology Consultation Note

North Cove Demo Neurology

Patient: Jordan Test | Fully fictional identity

Date of service: 2024-06-05

Record type: Specialist | Prepared by: Consulting neurologist

REASON FOR CONTACT

Review of intermittent tingling and radiating leg pain.

OBSERVATIONS / FINDINGS

Symptoms fluctuate with posture; no sustained weakness recorded in fictional examination summary.

ASSESSMENT / INTERPRETATION

Clinical picture may be consistent with lumbar radicular symptoms.

PLAN / NEXT STEP

Continue conservative care; consider repeat clinical assessment if symptoms progress.

Fabricated names, facilities, symptoms and events for testing only.
Not clinical advice, evidence, a claim record or a real medical chart.
